## 2021-2022 Annual Purchase of Service (POS) Expenditure Data Community Meetings

**Date:** March 9, 2022

**Name of Meeting:** POS Expenditure Data Community Meeting to LICA Community

**Presenter:** Salvador Gonzalez, Director of Service Access and Equity Department

- **Start Time: 9:32 AM**
- **End Time: 10:36 AM**
- **102 in Attendance**
- **PowerPoint Presentation – 2021-2022 POS Expenditure Data**

**Introductions:** Lupe Magallanes-Associate Director, Early Childhood Development Services

Explained the purpose of the meeting and informed participants that questions could be asked throughout the meeting.

**Josie Martinez** discussed Parent Mentor Initiative

**Tiffany Loong** discussed LACC upcoming projects and resources.

**Adrianna Utley** discussed First 5- Help Me Grow Grant and upcoming transition trainings

**Nora Perez- Givens** discussed consultations and upcoming trainings.

**Amos Byun** discussed outreach to Asian community, data collection and seesaw program

**Marilyn Carmona** discussed healthcare liaisons and provided days of meetings

**9:42am**

**Question from participant:** My child is 24 and is not receiving help from SG/PRC in regards to rent, food, living expenses etc.,. How can I get that information to help him?

**Answer from Sal:** That would be considered a no-POS case and something we want to look at to see how SG/PRC can help. Sal's email was put into the chat and for any follow up.

**9:48- Statement from Lupe-** I am Proud of 4.1% of no-POS as this is usually because children are being serviced via their insurance. Hispanic number of 77 looks high but this is because its the largest population in our catchment area so that explains the number.

## 2021-2022 Annual Purchase of Service (POS) Expenditure Data Community Meetings

### 9:52am

**Question from Lupe-** Maybe we can have the data broken down more with the numbers looking at ages 3-6 as we will have lower caseloads with this population so we want to help them more intensely

**Answer from Sal:** Yes of course, we can look into that for next year's presentation.

### 10:12am

**Question from participant:** How does SG/PRC provide support to families when they aren't eligible with regional center or school districts to get services through the ESPDT services?

**Answer from Adrianna:** The SC provides family with options as child is turning 3 in regard to services if they aren't eligible for services with regional center or LEAs. I am also of Support to help guide families (provided information in chat).

**Question from participant:** Does SG/PRC have any managed care liaisons to help with medical services?

**Answer from Lupe:** We have a liaison that helps support families with medical and can provide a list.

**10:33 Statement from participant:** Thank you for making the effort to bring this info to families and especially having it in different language and I would love for you to continue it for our families.

**10:34 Statement from Lupe Magallanes-** As we work with our little ones and they graduate from our program, this info very important because we have to think about our families beyond them leaving a certain stage and provide them information and support. We are one entity among many that can support them so even though we may not be able to provide the support we can connect them to other entities and support its important for us to support them through all stages of their journey but by proving this information we empower them.
